

The FCC should not implement any proposal that would lessen Indiana's Telephone Privacy law protections. Indiana's Telephone Privacy law has improved my time at home. Indiana's law has been effective for me as a homeowner. I used to receive 20 or more calls per week, any time of the day or night, now I might receive one a month. This law has helped me feel more secure about being at home alone and the possibility of criminal activity, stalking, or harassing phone calls has diminished due to the unknown and blocked calls being reduced. This law should not be modified or changed in any way.
